DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

A. liquid carrier

1. non-aqueous solvent

2. water

B. oxidizing agent

C. polishing additive

1. phosphorous-containing compound

2. nitrogen-containing compound

3. sulfur-containing compound

4. carboxylic acid.

D. stopping compound

21 different stopping compounds described in claim 1 plus compounds comprising imines, amides, and imides in claim 52 (total 24 species of stopping compounds).

E. passivation film forming agent

F. polishing pad / abrasive

1. abrasive suspended in the liquid carrier

2. the abrasive is fixed on the polishing pad

3. no abrasive in the system and polish pad is non-abrasive containing.

G. There are 6 different kinds of abrasives in the Markush group in claim 30, however, the examiner decides not to further restrict the claim at this time.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of each category (A, B, C, D, E, and F) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

2. Applicant is advised that a reply to this requirement must include **an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Because it involves different search and would impose a serious administrative burden on the examiner, it requires restriction / election. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kin-Chan Chen whose telephone number is (703) 305-0222. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Benjamin Utech can be reached on (703) 308-3836. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2934.
